## PROCESSING CONDITIONS

Typical processing conditions for 6812NJ are: Melt temperature: 205 - 220°C, Blow up ratio: 2.0 - 3.0

#### STORAGE AND HANDLING

Polyethylene resin should be stored in a manner to prevent a direct exposure to sunlight and/or heat. The storage area should also be dry and preferably do not exceed 50°C. SABIC would not give warranty to bad storage conditions, which may lead to quality deterioration such as color change, bad smell and inadequate product performance. It is advisable to process PE resin within 6 months after delivery.
