

SABIC® PP FPC70T

POLYPROPYLENE IMPACT COPOLYMER
REGION ASIA

DESCRIPTION

SABIC® PP FPC70T is part of the SABIC® PP FLOWPACT portfolio dedicated for thin wall packaging application. It offers very high melt flow rate along with good stiffness / impact balance enable very fast production speed while maintain good product integrity. It is designed to have good organoleptic performance to minimize potential taste and smell transfer to the food contents. SABIC® PP FPC70T also has very good impact resistance even at low temperature. This make it particularly suitable for the production of ice cream container, yoghurt tub, margarine container and other thin wall packaging for low temperature storage.

TYPICAL APPLICATIONS

SABIC® PP FPC70T is suitable for production of food contact thin wall packaging which includes packaging for frozen food, ambient food and dairy products (e.g. yoghurt, butter, cheese, etc.).

STORAGE AND HANDLING

The resin should be stored in a manner to prevent a direct exposure to sunlight and / or heat. The storage area should also be dry and preferably do not exceed 50°C. SABIC would not give warranty to bad storage conditions that may lead to quality deterioration such as color change, bad smell and inadequate product performance. It is advisable to process PE resin within 6 months after delivery.
